

2024 年硕士研究生招生考试试题

【B】卷

科目代码及名称：211 翻译硕士英语

考生须知

1. 答案须写在报考点提供的答题纸上，一律使用黑色钢笔或签字笔。
2. 考毕，请将试题和答卷放入试题袋内密封后，在封条与试卷袋骑缝处亲笔签名。

Part I. Multiple-choice (20 points)

Directions: There are twenty multiple-choice questions in this part. Choose the best answer to each question. Please write your answers on the Answer Sheet.

1. The ants are so minute that they can dodge the rays and so survive the _____.
A. order B. odor C. ordeal D. odds
2. She stalked, stiff-legged like a wolf, into the darkling garden and like a wolf she _____ the air.
A. applauded B. drained C. scorned D. sniffed
3. To my grandma, hamburgers and cheese all look and taste _____; she prefers Chinese food to foreign food.
A. delicious B. exotic C. flavored D. fragrant
4. Without another word she turned and _____ out, leaving him to follow.
A. stalked B. sneaked C. crept D. approached
5. This new cooker has a special way of cleaning itself, so it saves all the trouble of _____ off the dirt.
A. scouring B. bubbling C. erasing D. draining
6. Canadian Lynn Johnston was named Cartoonist of the Year in 1985, the first woman to be so _____.
A. inspired B. refined C. honored D. entrusted
7. Because the photographer believed that wild animals should be _____ only in their various natural surroundings, she _____ often in her career.
A. displayed; spoke B. depicted; traveled
C. captured; protested D. domesticated; roamed
8. One requirement of timeless art is that it deepens and _____ our awareness, not that it merely confirms what we already know.
A. hinders B. controls C. reconciles D. extends

9. He was a mousy man: long thin _____ of hair protruded erratically from under his steel helmet.
A. strands B. blocks C. chunks D. slices
10. Soon hundreds were camping out in the empty Casino and the closed exhibit halls where they _____ fires to keep warm.
A. smoldered B. smothered C. kindled D. matched
11. Although the editors were reputed to be very _____, the uneven quality of the material they put into the anthology suggests they were too _____.
A. selective; inclusive B. judgmental; discriminating
C. sensitive; insightful D. optional; professional
12. She _____ recognition and fame, yet she felt a deep suspicion and contempt for the world in which recognition and fame are granted.
A. yearned for B. worked for C. mistrusted in D. aspired of
13. I see developing trees with only two main growth arteries where one has been _____, leaving an odd-looking lopsided thing.
A. dragged off B. lopped off C. tugged away D. pulled away
14. Half an hour after they had started, it began to rain hard, and a bitter cold wind _____.
A. caught on B. hanged out C. sprang up D. blasted away
15. My work is not very profitable _____ money, but I'm getting valuable experience out of it.
A. in exchange for B. in terms of C. in quest of D. in favor of
16. Even when he was threatened with death, the political prisoner refused to _____ his speeches against the vicious government.
A. resume B. reassure C. retract D. resurrect
17. The formation of the British Empire went through two processes: aggression with national states and _____ with the uninhabited or sparsely populated wild lands.
A. annotation B. anticipation C. annihilation D. annexation
18. In 1807, the Indian troops staged a _____ because of the issue of cartridge grease with cow-fat, which offended Hindus, or pig-fat, which offended Muslims.
A. mould B. mythos C. motto D. mutiny
19. Paradoxically, these children, products and victims of the atomic era, were also its _____.
A. auditors B. beneficiaries C. alumni D. spouses
20. She never praised others; she'd rather _____ them.
A. deceive B. exhilarate C. cajole D. belittle

Part II. Reading Comprehension (30 points)

Directions: There are 3 passages in this part. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A, B, C and D. You should decide on the best choice and write your answers on the Answer Sheet.

Passage one

Questions 21 to 25 are based on the following passage.

Pheromones are substances that serve as chemical signals between members of the same species. They are secreted to the outside of the body and cause other individuals of the species to have specific reactions. Pheromones, which are sometimes called social hormones, affect a group of individuals somewhat like hormones do an individual animal. Pheromones are the predominant medium of communication among insects (but rarely the sole method). Some species have simple pheromone systems and produce only a few pheromones, but others produce many with various functions. Pheromone systems are the most complex in some of the so-called social insects, insects that live in organized groups.

Chemical communication differs from that by sight or sound in several ways. Transmission is relatively slow (the chemical signals are usually airborne), but the signal can be persistent, depending upon the volatility of the chemical, and is sometimes effective over a very long range. Localization of the signal is generally poorer than localization of a sound or visual stimulus and is usually effected by the animal's moving upwind in response to the stimulus. The ability to modulate a chemical signal is limited, compared with communication by visual or acoustic means, but some pheromones may convey different meanings and consequently result in different behavioral or physiological responses, depending on their concentration or when presented in combination. The modulation of chemical signals occurs via the elaboration of the number of exocrine glands that produce pheromones. Some species, such as ants, seem to be very articulate creatures, but their medium of communication is difficult for humans to study and appreciate because of our own olfactory insensitivity and the technological difficulties in detecting and analyzing these pheromones.

Pheromones play numerous roles in the activities of insects. They may act as alarm substances, play a role in individual and group recognition, serve as attractants between sexes, mediate the formation of aggregations, identify foraging trails, and be involved in caste determination. For example, pheromones involved in caste determination include the queen substance produced by queen honey bees. Aphids, which are particularly vulnerable to predators because of their gregarious habits and sedentary nature, secrete an alarm pheromone when attacked that causes nearby aphids to respond by moving away.

21. What does the passage mainly discuss?

- A. How insects use pheromones to communicate
- B. How pheromones are produced by insects
- C. Why analyzing insect pheromones is difficult
- D. The different uses of pheromones among various insect species

22. The passage suggests that the speed at which communication through pheromones occurs is dependent on how quickly they _____.
A. lose their effectiveness
B. evaporate in the air
C. travel through the air
D. are produced by the body
23. According to the passage, the meaning of a message communicated through a pheromone may vary when the _____.
A. chemical structure of the pheromone is changed
B. pheromone is excreted while other pheromones are also being excreted
C. exocrine glands do not produce the pheromone
D. pheromone is released near certain specific organisms
24. According to paragraph 2, which of the following has made the study of pheromones difficult?
A. Pheromones cannot be easily reproduced in chemical laboratories.
B. Existing technology cannot fully explore the properties of pheromones.
C. Pheromones are highly volatile.
D. Pheromone signals are constantly changing.
25. Pheromone systems are relatively complex in insects that _____.
A. also communicate using sight and sound
B. live underground
C. prey on other insects
D. live in organized groups

Passage two

Questions 26 to 30 are based on the following passage.

“Let me send you our brochure” is probably the most commonly used phrase in business. But all too often, it can spell the end of a customer enquiry because many brochures appear to be produced not to clarify and to excite but to confuse. So what goes wrong and how can it be put right? Too often, businesses fail to ask themselves critical questions like, “Who will the brochure be sent to?” “What do we want to achieve with it?” The truth is that a brochure has usually been produced for no other reason than that the competition has one.

However, with a little research, it often transpires that what the client wants is a mixture: part mail shot, part glossy corporate brochure and part product catalogue -- a combination rarely found. Having said that, the budget is likely to be finite. There may not be enough money to meet all three marketing needs, so the first task is to plan the brochure, taking into account the most significant of these. The other requirements will have to be met in a different way. After all, introducing the company’s product range to new customers by mail is a different task from selling a new season’s collection to existing customers.

The second task is to get the content right. In 95 per cent of cases, a company will hire a designer to oversee the layout, so the final product looks stylish, interesting and professional;

but they don't get a copywriter or someone with the right expertise to produce the text, or at least tidy it up -- and this shows. A bigger failing is to produce a brochure that is not customer focused. Your brochure should cover areas of interest to the customer, concentrating on the benefits of buying from you.

Instead, thousands of brochures start with a history lesson, "Founded in 1987, we have been selling our products." I can assure you that customers are never going to say to themselves, "They've been around for 20 years – I'll buy from them." It's not how long you've been in business that counts, it's what you've done in that time. The important point to get across at the beginning is that you have a good track record. Once this has been established, the rest of the brochure should aim to convince customers that your products are the best on the market.

It is helpful with content to get inside the customer's head. If your audience is young and trendy, be creative and colorful. As always, create a list of the benefits that potential customers would gain from doing business with you, for example, product quality, breadth of range, expertise of staff and so on. But remember that it is not enough just to state these; in order to persuade, they need to be spelt out. One possibility is to quote recommendations from existing customers. This also makes the brochure personal to you, rather than it simply being a set of suppliers' photographs with your name on the front.

At the design stage, there are many production features that can distinguish your brochure from the run of the mill. You may think that things like cutouts or pop-ups will do this for you and thus make you stand out, or you may think they just look like designer whims that add cost. Go through all the options in detail. One of them might be that all-important magical ingredient.

26. What point does the writer make about brochures in the first paragraph?

- A. Customer expectations of them are too high.
- B. They ought to be more straightforward in design.
- C. Insufficient thought tends to go into producing them.
- D. Companies should ensure they use them more widely.

27. The writer's advice to companies in the second paragraph is to _____.

- A. produce a brochure to advertise new product lines.
- B. use a brochure to extend the customer base.
- C. accept that a brochure cannot fulfil every objective.
- D. aim to get a bigger budget allocation for producing brochures.

28. In the third paragraph, which of the following does the writer say would improve the majority of brochures?

- A. better language and expression
- B. better overall appearance
- C. more up-to-date content
- D. more product information

29. In the introduction to a brochure, the writer advises companies to focus on _____.
A. their understanding of the business environment.
B. the range of products they offer.
C. their unique market position.
D. the reputation they have built up.
30. When discussing brochure content in the fifth paragraph, the writer reminds companies to _____.
A. consider old customers as well as new ones. B. provide support for the claims they make.
C. avoid using their own photographs. D. include details of quality certification.

Passage three

Questions 31 to 35 are based on the following passage.

Market Entry -- The Pioneer Marc Crystal discusses the “be first to market” principle. The timing of market entry is critical to the success of a new product. A company has two alternatives: it can compete to enter a new product market first -- otherwise known as “pioneering” -- or it can wait for a competitor to take the lead, and then follow once the market has been established. Despite the limitations of existing research, nobody denies that there are advantages to being a pioneering company. Over the years, there has been a good deal of evidence to show a performance advantage for pioneers.

For many new products, customers are initially unsure about the contribution of product characteristics and features to the product’s value. Preferences for different characteristics and their desired levels are learned over time. This enables the pioneering company to shape customer preferences in its favor. It sets the standard to which customers refer in evaluating followers’ products. The pioneering product can become the classic or “original” product for the whole category, opening up a flood of similar products onto the market, as exemplified by Walkman and Polaroid.

The pioneering product is a bigger novelty when it appears on the market, and is therefore more likely than those that follow to capture customer and distributor attention. In addition, a pioneer’s advertising is not mixed up with competitors’ campaigns. Even in the long term, followers must continue to spend more on advertising to achieve the same effect as pioneers. The pioneers can set standards for distribution, occupy the best locations or select the best distributors, which can give them easier access to customers. For example, in many US cities the coffee chain Starbucks, as the first to market, was able to open coffee bars in better known locations than its competitors. In many industrial markets, distributors are not keen to take on second and third products, particularly when the product is technically complex or requires large inventories of spare parts.

“Switching costs” arise when investments are required in order to switch to another product. For example, many people have developed skills in using the traditional “qwerty” keyboard. Changing to the presumably more efficient “dvorak” keyboard would require relearning how to type, an investment that in many cases would exceed the expected benefits in efficiency. Switching costs also arise when the quality of a product is difficult to assess. People who live abroad often experience a similar “cost” when simple purchase decisions such as buying detergent, toothpaste or coffee suddenly become harder because the trusted

brand from home is no longer available. Pioneering products have the first chance to become this trusted brand. Consequently, the companies that follow must work hard to convince customers to bear the costs and risks of switching to an untried brand of unknown quality.

Unlike other consumer sectors, the value to customers of many high technology products relies not only on their features but also on the total number of users. For example, the value of a videophone depends on the number of people using the same or a compatible system. A pioneer obviously has the opportunity to build a large user base before competitors enter the market. This reduces followers' ability to introduce differentiated products. There are other advantages of a large user base, such as the ability to share computer files with other users. Thus, software companies are often willing to give away products to build the market quickly and set a standard.

31. In the first paragraph, the writer points out that _____.
A. there is general agreement on the benefits of pioneering products.
B. companies are still uncertain about how to market new products.
C. most companies prefer to market new products independently.
D. there are now guidelines to help those who wish to pioneer.
32. According to the information in the second paragraph, how do customers approach new products?
A. They consider cost an important feature.
B. They make comparisons with other new products.
C. They need some persuasion to purchase them.
D. They take some time to develop a liking for them.
33. The writer refers to Walkman and Polaroid because they were _____.
A. better than any of their followers.
B. designed for a particular market.
C. quickly accepted by consumers.
D. copied many times by their followers.
34. When pioneering products are promoted, the writer notes that _____.
A. a heavy financial investment is required.
B. a wide variety of advertising methods must be used.
C. a clear message is likely to be communicated.
D. a long campaign is usually necessary.
35. According to the final paragraph, the high technology market differs from other consumer markets in that _____.
A. it is still a relatively new area of consumerism.
B. it is not dependent on product characteristics alone.
C. there are so many different types of product on the market.
D. there is such a great demand for high technology products.

Part III. Proofreading and Error Correction (10 points)

Directions: The following passage contains TEN errors. Each indicated line contains a maximum of ONE error. In each case, only ONE word is involved. You should proofread the passage and correct it. Please write your answers on the Answer Sheet.

Traditionally, the American farmer has always been independent and hard-working. In the 18th century farmers were quite self-sufficient. The farm family grew and made almost nothing it needed. The surplus crop would be sold to 36. _____ buy a few items in the local general store.

In 1860, because some of the farm population had moved 37. _____ to the city, yet eighty percent of the American population was still in the country. In the late 19th century, farm work and life were not much changed from that they had been in the old 38. _____ days. The farmer aroused at dawn or before and had much work 39. _____ to do, with his own muscles like his chief source of power. He 40. _____ used axes, spades, and other complicated tools. In his house 41. _____ cooking was done in wood-burning stoves, the kerosene lamp 42. _____ was the only improvement on the candle. The family's recreation and social life chiefly consisted of a drive in the wagon to the nearby small town or village to transact some business as well as chat with neighbors who had also come to 43. _____ the town. The children attended a small elementary school (often of just one room) to that they had to walk every day, 44. _____ possibly for a few miles. The school term was short so that the children could help in the farm. 45. _____

Although the whole family worked, and life was not easy, farmers as a class were self-reliant and independent.

Part IV. Cloze (10 points)

Directions: Please fill in blanks 46 to 55 of the following passage. Write your answers on the Answer Sheet.

Adolescents are taking longer to become fully productive members of society, Reed Larson, professor of human development, University of Illinois, Champaign, told the World Future Society, Bethesda, Md. "What we expect of young people is (46)," he argued. They must go to school for 12 years or longer without any (47) that their education will mean career success or relevance when they become adults. (48), they do so without financial rewards, accept an identity defined by society, and delay starting a family, all of (49) keeps adolescents

in a kind of indeterminate state for years.

Larson says that “There should be way stations along the climb (50) adulthood that allow young people to rest, gather themselves, and consider (51).” The success of government, business, and private life in the next 50 years depends on it.

Education, literacy, and versatile interpersonal skills (52) the list of necessary preparations for adulthood. Young people negotiating the complex worlds of home, work, and school must use these skills in order to do so (53) and competently. “The adolescent who is able to (54) in only one world is increasingly ill-prepared for adult life,” he warns.

As the time spent on the road to adulthood increases, so does the danger that more youths will fall by the wayside. New and increased opportunities and initiatives will keep more youngsters focused, (55) a smarter, more-versatile generation able to cope with the emerging global, high-tech world.

- | | | | |
|----------------------|-----------------|-----------------|------------------|
| 46. A. aggressive | B. original | C. rigid | D. extraordinary |
| 47. A. qualification | B. guarantee | C. probability | D. recognition |
| 48. A. However | B. Subsequently | C. Furthermore | D. Therefore |
| 49. A. these | B. that | C. what | D. which |
| 50. A. into | B. to | C. on | D. for |
| 51. A. temptations | B. occasions | C. alternatives | D. inclinations |
| 52. A. top | B. cover | C. hold | D. rate |
| 53. A. temporarily | B. smoothly | C. instantly | D. periodically |
| 54. A. operate | B. engage | C. tackle | D. function |
| 55. A. created | B. create | C. creating | D. to create |

Part V. Writing (30 points)

Directions: Write an essay of no less than 450 words on the topic given below. Use the space provided on your Answer Sheet.

“To get success, you need friends; to get huge success, you need enemies.” Do you agree with this saying or not? Why or why not?
